

STORAGE OF STATE FAIR MINI DONUTS

& Handling Shelf-life Guidance

Please place donuts in your freezer as they can be refrozen once and will have a one-year shelf life from production.

1

Ambient Shelf Life at room temperature once slacked out is 7 days.

2

Each sub box is shrunk wrapped to preserve quality and shelf life.

3

When projecting daily needs, any donuts once you open a box, should be stored during the day in a sealed plastic container to prevent drying out.

4

Any donuts left at the end of the day can be carried into the following day provided the donuts are stored in sealed plastic container.

5

Never refrigerate product as this will stale the donuts.
